Professional Summary

Python backend developer with experience designing and deploying scalable APIs, distributed systems, and AI-powered applications. Proficient in FastAPI, PostgreSQL, Redis, Docker, and cloud infrastructure (AWS). Hands-on with LLM integration, vector databases. Comfortable across the full backend lifecycle from architecture and development to containerization deployment.

Skills

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks: FastAPI, Flask, Django, Celery

Background Processing: Temporal, RabbitMQ

Cloud & DevOps: AWS (S3, EC2), Docker, CI/CD, Git/GitHub

Databases: PostgreSQL, MySQL, MongoDB, Redis, Qdrant

API & Tools: REST APIs, Nginx, JWT Authentication, Async/Asyncio, Postman, Microservices

Work Experience

Surepass Technologies, New Delhi

Oct 2024 - Present

Backend Python Developer

- Built scalable REST APIs using FastAPI, SQLAlchemy, and PostgreSQL with async processing to handle high concurrent requests.
- Engineered a distributed workflow orchestration system using Temporal, automating 5000+ verification processes.
- Built Python-based web scraping scripts (Request/Selenium) to automate data extraction for verification workflows.
- Reduced API response time by 45% using Redis caching and optimized query performance.
- Designed a multi-tenant architecture with secure secret management and role-based access control.
- Containerized microservices using Docker and improved deployment efficiency through CI/CD pipelines.
- Technologies:** Python, FastAPI, SQLAlchemy, Temporal, PostgreSQL, Redis, MongoDB, AWS S3, Docker.

Mindrops, New Delhi

Mar 2024 - Sep 2024

Python Web Developer

- Developed and customized WordPress websites using HTML, CSS, and JavaScript for client projects.
- Built responsive UI components and optimized page performance, improving user engagement.
- Collaborated with backend/API teams to connect frontend interfaces with REST endpoints.
- Integrated third-party plugins and implemented custom theme modifications based on business requirements
- Technologies:** HTML5, CSS3, JavaScript, WordPress, Git

Education

MDU University

2021 – 2024

Bachelor of Computer Applications (BCA)

Relevant Coursework: Object Oriented Programming, Databases, Discrete Mathematics, Data Structures and Algorithms, Operating Systems.

Chandigarh University

2024 – 2026 (Pursuing)

Master of Computer Applications (MCA)

Python Programming, Design and Analysis of Algorithms, Docker Containerization, CI/CD, Cyber Security, Kubernetes, Cloud Security, Software Testing, Front-End Technologies.

Project Work

- RAG System** | Python, FastAPI, Docker, MongoDB, Vector-DB Qdrant, Google Gemini, LangChain, AWS S3
Built a production-ready PDF question-answering pipeline using RAG. Automated ingestion with chunking, Gemini embeddings, and Qdrant vector indexing. Coordinated data across S3, MongoDB, and Qdrant — delivering sub-2s query responses via a Dockerized FastAPI service.
- Full-Stack Human Resource Management System (HRMS)**
Containerized HR platform automating employee onboarding, attendance, and RBAC for 100+ employees. RESTful API built with FastAPI and SQLAlchemy; deployed via Docker Compose and Nginx with health-check logic for zero-downtime restarts.
- ATS Resume Ranker** | Python, FastAPI, Hugging Face
AI resume screening tool ranking candidates by JD similarity using BERT semantic embeddings. Achieved 85% accuracy on 200+ resumes with sub-second inference. Served via FastAPI, deployed on Vercel.
