OBJECTIVE

I am seeking a challenging role in a dynamic organization where I can leverage my experience in backend development, API design, and problem-solving to contribute to the company's growth, while continuing to learn and expand my technical skills.

EDUCATION

Master of Computer Application, Chandigarh University Expected 2026

Bachelor of Computer Application, MDU University 2021 - 2024

TRAINING

Python Full-Stack Development Training

Ducat New Delhi, IN

- Training in back-end and front-end Python development, covering frameworks, libraries, and tools.
- Gaining hands-on experience in building full-stack applications.

SKILLS

Programming Languages	Python, JavaScript, HTML5, CSS3.
Frameworks	Flask, FastAPI, Django, RESTPlus, React.js, Node.js.
API Development	RESTful APIs, WebSocket, API Documentation, Postman.
Libraries	Requests, BeautifulSoup, pdf2xml, Tkinter etc.
Databases	MySQL, PostgreSQL, MongoDB.
Tools	Git, GitHub, VS Code, PyCharm, Render, Gunicorn, Docker.
Others	Redis, Celery, RabbitMQ, Web Scraping, Backend Architecture, Deployment.

EXPERIENCE

Software Engineer

Surepass Technologies Private Limited

October 2025 - Present
Netaji Subhash Place, Delhi, IN

- Developed and maintained RESTful APIs using Python frameworks including Flask, FastAPI, and RESTPlus.
- Designed and implemented scalable and secure backend architectures for multiple production applications.
- Collaborated with frontend developers to integrate APIs, ensuring seamless data exchange and UI functionality.
- Created API documentation and test cases to support integration and ensure maintainability.
- Utilized Python libraries such as requests, pdf2xml, and BeautifulSoup for data extraction, conversion, and automation.
- Worked with both relational (MySQL) and non-relational (MongoDB) databases to store and retrieve application data.
- Participated in client meetings to gather requirements, present solutions, and explain API workflows.
- Solved complex technical problems and performance issues in real-time backend systems.
- Managed multiple projects simultaneously, ensuring timely delivery and high-quality output.
- Actively contributed to the Tech Department, bringing backend expertise and process improvements.

- Developed and maintained responsive websites using HTML, CSS, Bootstrap, JavaScript, React.js, and WordPress.
- Contributed to the Himachal Government project, CCRC-(Climate Change Research Center), by traveling to Shimla to deliver on-site support
- Integrate Multiple Api's in a single project.
- Make Dynamic Website and creating a Backend as well as.
- Built dynamic user interfaces using HTML, CSS, Js, or single-page applications with React.js and for backend using a nodejs.
- Utilized Git for version control and project management.
- Work with the both type of databases relational or irrelational databases Like Mysql, MongoDB.

PROJECTS

Real-Time Chat Application (Python, Flask, Socket.IO) ([Try here](#))

- Developed a real-time chat app using Python, Flask, and Socket.IO with dynamic message updates.
- Implemented unique username generation and dynamic updates during user interactions.
- Integrated DiceBear API for custom avatars based on usernames.
- Deployed on Render for seamless performance in a production environment.
- Utilized WebSocket for persistent connections and real-time communication.
- Added features like username updates, user join/leave notifications, and system messages to enhance engagement.
- Technologies: Python, Flask, HTML, CSS, JS, Render, Gunicorn

AI Command Assistant ([Try here](#))

- Built a web-based assistant using Flask that enables users to search platforms like YouTube, Google, and Instagram from a single input form.
- Integrated dynamic URL handling and redirection based on user choice.
- Deployed live on Render using gunicorn for production server management.
- Technologies: Python, Flask, HTML, CSS, JS, Render, Gunicorn
